

Outlaw Overhaul

A Red Dead Redemption 2 Modlist & Guide

Version 1.32 · July 2026

Contents

Foreword	1
Installation & Setup	1
Wave 0: The Honorable Drifter	2
Wave 1: Full Outlaw Descent	6
Mod Catalog	9
Appendix	10

Foreword

Welcome to *Outlaw Overhaul*, a curated modlist and comprehensive guide for *Red Dead Redemption 2* version 1.32 (the March 19, 2024 patch).

What This Is

This guide is structured as two distinct playthrough “waves”:

- **Wave 0** is designed for first-time or casual players. It recommends only user interface and quality-of-life mods, keeping the vanilla experience intact while polishing rough edges. The accompanying walkthrough helps you master core mechanics.
- **Wave 1** transforms the game with graphics enhancements, additional content, and deeper mechanics. It assumes you have completed the story at least once and are ready for a more challenging, immersive experience.

Compatibility

All mods listed here have been verified against RDR2 version 1.32. We use *Lenny’s Mod Loader (LML)* as the sole modding framework. See the Installation section for detailed setup instructions.

Credits

A full list of mod authors, their mod pages, and acknowledgments can be found in the Mod Catalog.

Disclaimer

Modding carries inherent risks. Always back up your save files and game installation before adding mods. The authors of this guide are not responsible for corrupted saves, crashes, or other issues.

Installation & Setup

Follow these steps to prepare your game for modding. Perform them in order.

Prerequisites

- Red Dead Redemption 2 (version 1.32) — Steam, Rockstar Launcher, or Epic
- 2 GB free disk space for mod files
- Administrative access to your game installation directory

Step 1: Clean Game Installation

Ensure RDR2 is fully updated to version 1.32. Verify the version by checking the game properties in your launcher.

Steam: Library > RDR2 > Properties > Betas > "None"
Rockstar: Settings > RDR2 > Game Details

Step 2: Lenny’s Mod Loader (LML)

Download the latest version of Lenny’s Mod Loader from the official site.

1. Extract the archive to a temporary folder
2. Copy all files into your RDR2 installation root directory (where RDR2.exe lives)

RDR2 Installation/

```
|— RDR2.exe
|— version.dll          <- LML file
|— LML/                 <- will be created on first launch
|— lml_mods/            <- your mods go here
```

3. Launch the game once to verify LML installed correctly — you should see an LML notification in the top-left corner

Step 3: Script Hook RDR2

Some gameplay mods require Script Hook RDR2. Download it and place `ScriptHookRDR2.dll` and `ScriptHookRDR2.asi` in the game root directory.

Step 4: Verify Installation

Launch the game and check:

- LML version in the top-left notification
- Script Hook loads without errors (check `ScriptHookRDR2.log` in Documents or game root)

Folder Structure

```
RDR2 Installation/
├─ RDR2.exe
├─ version.dll
├─ ScriptHookRDR2.dll
├─ ScriptHookRDR2.asi
├─ LML/
├─ lml_mods/
│   ├── ModName1/      <- extracted mod folders
│   └─ ModName2/
└─ settings.xml        <- LML config (enable/disable mods here)
```

Removing Mods

To disable a mod, move its folder out of `lml_mods/`. To uninstall LML, remove `version.dll` and the `LML/` folder.

Wave 0: The Honorable Drifter

You step off the train in Colter with nothing but the clothes on your back and a debt to the man who pulled you from the snow. The mountains don't care about your past — only what you do next. Help those who need it, learn the land, and remember: out in the West, a reputation is earned one decision at a time.

Recommended Mods

The following mods enhance the vanilla experience without changing core gameplay. Install them before starting your Wave 0 playthrough.

Mod entries will be added here.

Controls

Controller (Xbox / PlayStation)

Stick / Button	Action
Left stick	Move / Swim
Right stick	Look / Aim
A / Cross	Sprint / Climb / Jump / Horse gallop
B / Circle	Melee / Tackle / Dismount horse
X / Square	Interact / Pick up / Cover
Y / Triangle	Access weapon wheel / Call horse
LT / L2	Aim weapon
RT / R2	Fire weapon / Accelerate horse

LB / L1	Run / Horse brake
RB / R1	Shoulder swap / Horse jump
D-pad Up	Open satchel
D-pad Down	Whistle / Call horse
D-pad Left	Toggle weapon aim mode
D-pad Right	Open item wheel
Right stick (click)	Enter Dead Eye / Eagle Eye
Left stick (click)	Crouch / Stand
View / Back	Open map

Keyboard (PC)

Key	Action
WASD	Move
Mouse	Look / Aim
Left click	Fire / Interact
Right click	Aim down sights
Shift	Sprint / Gallop
Ctrl	Crouch
Space	Jump / Climb / Cover
E	Interact / Pick up
R	Reload / Switch throwable
Q	Shoulder swap
Tab	Weapon wheel
Caps Lock	Run / Horse sprint
F	Melee / Tackle
V	Enter Dead Eye / Eagle Eye
M	Map
B	Satchel
L	Open compendium

How to Play

The Gameplay Loop

RDR2 alternates between story missions and open-world free roam. A typical session looks like:

1. Wake up at camp — check the ledger for upgrades, donate to maintain provisions
2. Check Arthur's satchel — craft or eat if cores are low
3. Pick a story mission (yellow icons on the map), a side mission (white icons), or head into the wilderness to hunt and explore
4. Return to camp or a town to sell loot, rest, save
5. Maintain cores (health, stamina, dead eye) by eating, sleeping, and using tonics

Navigation

- **Waypoint:** Open the map (M / View), set a waypoint, follow the red line on the mini-map

- **Cinematic travel:** Hold the gallop button on a road, then hold the cinematic view button — Arthur auto-rides to the waypoint
- **Fast travel:** Upgrade Dutch's lodging at camp to unlock fast travel from Arthur's bed. Stagecoaches in towns also fast travel between cities

Mission Structure

- **Yellow icons:** Main story — progress the narrative
- **White icons:** Side content — stranger missions, bounties, homesteads
- **Blue icons:** Companion activities — build relationships with gang members, unlock perks
- **Dotted circles:** Random encounters — dynamic events that appear on the map when nearby

Most missions are forgiving but reward clean execution: fewer deaths mean better accuracy stats and higher end-of-mission payouts.

Open-World Activities

- **Hunting & fishing:** Primary income source in the early game
- **Treasure hunting:** Find maps on NPCs or at points of interest — follow the clues for gold bars (\$500 each)
- **Exploration:** The map is filled with cabins, caves, and unique items (cigarette cards, dinosaur bones, rock carvings)
- **Gambling:** Dominoes, poker, and blackjack in towns and camp

Basic Strategy

Combat Fundamentals

- **Use cover:** LT / right-click to snap to cover. Peek and shoot rather than standing in the open
- **Headshots:** One bullet to the head kills most enemies regardless of weapon — prioritize accuracy over volume
- **Weapon selection:** Keep a rifle (bolt-action or Springfield) for range, a repeater (Lancaster) for mid-range, and a sidearm (Schofield or Cattleman) for close quarters
- **Dead Eye in combat:** Pop Dead Eye when outnumbered, paint targets on the nearest threats (usually the ones shooting at you), release to fire. This conserves ammo and health

Beginner Money-Making

Method	Early Access	Payout
Sell perfect pelts to Trapper	Chapter 2	\$2-15 per pelt
Treasure maps	Chapter 2	\$200 per gold bar
Loot enemies	Always	\$2-5 per body
Sell herbs to doctor	Chapter 2	\$2.50-2 each
Bounty hunting	Chapter 2 (Valentine)	\$20-30 per target

Core Mechanics

Dead Eye

Dead Eye is your most powerful tool. It slows time, letting you paint shots on multiple targets. The system unlocks in stages:

- **Chapter 1 (Colter):** Manual painting — tag targets and fire
- **Chapter 2 (Horseshoe Overlook):** Auto-paint on nearby enemies
- **Later chapters:** Critical shots and enhanced duration

Tip: Upgrade Dead Eye by completing story missions and crafting tonics at campfires. *Valerian Root* and *Chewing Tobacco* refill the meter.

Hunting

A reliable source of income and crafting materials.

1. Study an animal with binoculars to learn its quality rating
2. Use the correct weapon for the animal's size (rifle for deer, varmint for rabbits, bow for perfect pelts)
3. Clean kills preserve pelt quality — aim for the head or heart
4. Bring pelts to Pearson at camp or sell to the Trapper

Honor System

Your actions affect Arthur's honor meter, which influences NPC reactions, shop prices, and story outcomes.

Action	Effect
Greeting strangers	1. Honor
Helping strangers	1. Honor
Donating to camp	1. Honor
Robbing/killing innocents	• Honor
Bounty evasion	• Honor

Crafting

- **Pearson (Camp):** Upgrades satchel capacity, camp equipment
- **Trapper (World):** Craft unique outfits and gear from legendary animal parts
- **Campfire:** Cook meat for health/stamina/dead eye buffs; craft ammo, tonics, and throwables

Survival Tips

Core Management

Arthur has three cores: Health, Stamina, Dead Eye. Each has a grey inner ring (current value) and an outer ring (maximum capacity). Keep them full:

- **Eat regularly:** Cooked meat restores all cores. Big game meat (bear, wolf, alligator) provides the best saturation
- **Sleep:** Sleeping at camp or hotels restores all cores and saves the game
- **Tonics:** Potent tonics restore a large chunk instantly — craft them at campfires with ginseng, sage, and other herbs

Horse Care

Your horse is your most important asset. If it dies before bonding level 4, the loss is permanent.

- **Bonding:** Ride, brush, feed, and lead your horse to increase bonding (4 levels). Higher bonding unlocks rearing, drifting, and response whistling
- **Health:** Horse reviver is essential — carry at least one at all times
- **Stamina:** Tap the gallop button rhythmically rather than holding it to conserve stamina. Calm your horse (G / LB) while riding to restore stamina
- **Stabling:** Buy, sell, and manage horses at stables. Your primary horse is stored at camp

Camp Management

Donate money and supplies to the camp ledger. Upgrades unlock fast travel, better provisions, and improved morale. Priority upgrades:

1. **Dutch's lodging:** unlocks fast travel from camp
2. **Medical supplies:** unlocks health tonics and miracle tonics
3. **Leather-working tools:** unlocks improved satchel crafting at Pearson
4. **Chicken coop / milk cow:** steady supply of eggs and milk for gold cores

Chapter Highlights

Chapter 1 — Colter

- Tutorial chapter. Learn movement, shooting, and Dead Eye basics.
- *Tip:* Loot every body for cash and supplies.

Chapter 2 — Horseshoe Overlook

- The world opens up. Explore, hunt, and complete side content.
- *Tip:* Complete the “Money Lending and Other Sins” Strauss missions early — they unlock the camp ledger.

Chapter 3 — Clemens Point

- Mid-game. Gang tensions rise. Focus on camp upgrades.
- *Tip:* Treasure maps found during exploration pay out well.

Chapter 4 — Shady Belle

- Prepare for Chapter 5. Purchase better weapons and upgrade your saddle.

Chapter 5 — Guarma

- Linear story chapter. Minimal free roam. Focus on story missions.

Chapter 6 — Beaver Hollow

- Endgame. Arthur's health declines. Complete all side content and companion requests before the final missions.

Transitioning to Wave 1

Create a separate save file before starting a Wave 1 playthrough. Wave 1 requires a fresh playthrough with new mods — do not add Wave 1 mods to an existing Wave 0 save.

Wave 1: Full Outlaw Descent

You've seen what the law can do. You've played by their rules long enough. Now it's time to write your own. The gangs are fighting, the towns are ripe, and the Frontier is ready for someone ruthless enough to take it. Leave the honor to the grave — an outlaw's legacy is written in wanted posters.

Recommended Mods

Wave 1 mods add graphics enhancements, new content, and deeper mechanics. Install *all* of these on a clean game installation before starting.

Mod entries will be added here.

Expert Combat Strategy

Dead Eye Mastery

- **Manual painting (all chapters):** Enter Dead Eye, paint targets yourself with RB / R1, then release. This lets you choose exactly where each bullet lands — vital for stealth and high-value targets
- **Regen loop:** Pop Dead Eye, paint 3-4 heads, release, immediately drink chewing tobacco, repeat. You can clear a room before the first body hits the floor
- **Snake oil:** Craft Snake Oil (vanilla flower + rum) for dead eye regen without the blurry vision side effect of tonics

Weapon Loadouts

Scenario	Primary	Secondary	Sidearm
Open field	Carcano rifle	Lancaster repeater	Dual Schofields
Close quarters	Pump-action shotgun	Semi-auto pistol	Machete
Stealth	Improved bow	Varmint rifle	Throwing knives
Bounty capture	Bolt-action rifle	Repeater	Lasso + reinforced

Advanced Gunplay

- **Paint it black:** This Dead Eye ability (unlocked level 6, Chapter 4) lets you paint targets anywhere in the reticle, not just on the body. Combine with express ammo for one-shot kills at any range
- **Dual wielding:** Equip two sidearms from the weapon wheel. Fire alternately for double the rate of fire, or fire both at once (hold both triggers) for a devastating burst
- **Ammo types:** Express (more damage), High Velocity (more range, better penetration), Split Point (crafted, best accuracy + damage). Always use Express or Split Point for combat — standard ammo is for practice

Mounted Combat

- **Dead Eye on horseback:** Paint and fire while galloping. The slower your horse, the tighter your reticle
- **Pendulum shot:** Fire at the top of the gallop bounce for maximum accuracy. The game compensates for your movement — lead your target by about one horse length
- **Dismount tactic:** Dismount into cover to turn a running gunfight into an ambush. Your horse will flee a short distance and return when whistled

High-End Economy

Endgame Income Loop

Once you have the Legend of the East satchel (crafted at Pearson with all other satchels — 99 carry capacity on every item):

1. Hunt three perfect cougar pelts (respawning locations near Annesburg/Strawberry) — sell to Trapper for \$60+
2. While waiting for cougar respawn, collect orchids and lady slippers for Algernon Wasp (Chapter 4 side mission) — \$150 per delivery
3. Loot every enemy camp and sell valuables (gold wedding rings, pocket watches, belt buckles) to the fence in Saint Denis
4. Play poker in Saint Denis — \$300 cap per session, save scum for consistent wins

Herbalist Money

Certain herbs are incredibly valuable and plentiful:

Herb	Location	Sell Price	Notes
Ginseng	Forest floors	\$2.50	Common, respawns fast
Sage	Great Plains, New Hanover	\$2.75	Needed for potent tonics
Orchids	Bayou, Bluewater Marsh	\$2.50	Rare, tied to Algernon mission
Oleander	Bayou edges	\$2.00	Toxic — used for poisonous weapons

Advanced Survival

Traversal Efficiency

- **Fast travel network:** In Wave 1 you should unlock all stagecoach stations and train routes early. Combine with camp fast travel for near-instant movement across the map
- **Horse rotation:** Keep 2-3 horses at camp. Use a war horse (Turkoman, Ardennes) for combat zones and a race horse (Arabian, Missouri Fox Trotter) for traversing long distances. Switch at camp or stables
- **Waypoint chaining:** Set a waypoint to the farthest destination, then set intermediate waypoints at stables and fence locations along the route — never backtrack

Weather and Environment

- **Cold weather:** New Hanover and Ambarino drain your health core if Arthur isn't wearing cold-weather gear. Keep a warm outfit (sheepskin jacket, gloves, hat) on your horse
- **Bayou:** Saint Denis and Lagras have high disease risk. Eat cooked food (not raw) and sleep in hotels to reset
- **Night:** Enemies have lower vision at night. Use the cover of darkness for stealth approaches and train robberies

Playstyle Suggestions

The Highwayman

Focus on stagecoach and train robberies. Hit the Cornwall Kerosene & Tar coach outside Valentine for early capital. Graduate to the train tunnel near Riggs Station for an ambush that lawmen can't easily reach. Spend profits on the best horses and weapons — reinvest in crime.

The Land Baron

Live off the land. Hunt legendary animals, craft everything at the Trapper, sell surplus meat and pelts. Invest the proceeds in the camp and stable upgrades. Only engage in story missions when you need a change of pace. *Suggested challenge:* Go 10 in-game days without entering a town.

The Bounty Killer

Target only bounty missions and legendary bounties. Bring every target in alive for double payout + honor gain. Use the reinforced lasso and bounty wagon to transport multiple targets. Build reputation as the most feared bounty hunter in the West — then betray the law when Wave 1's outlaw mods make crime more profitable.

The Collector

100% completion run. Hunt every cigarette card, dinosaur bone, dreamcatcher, rock carving, and grave. Use the compendium to track progress. This playstyle rewards patience and thorough exploration — the game hides its best secrets in the farthest corners of the map.

The Menace

Maximum chaos. Low honor from Chapter 2. Rob every store, hold up every stagecoach, kill witnesses before they report you. Never pay off a bounty — let the bounty hunters come. Fight them for the XP and loot. *Suggested challenge:* Survive a 5-star wanted level in Saint Denis for 5 minutes.

Roleplaying Prompts

- Play through the game without using the mini-map — navigate by road signs, landmarks, and the sun
- Change Arthur's outfit to match the region you're in (cold gear in Ambarino, light clothes in Lemoyne)
- Stay in hotels instead of sleeping at camp when you're "on a job"
- Only save the game at campsites or hotels — no quick-save
- If Arthur dies, drop \$100 from your cash (a "hospital bill")

Save Management

Wave 1 mods change game mechanics. Keep backups:

```
Documents/Rockstar Games/RDR2/Profiles/  
├─ wave0_backup/      <- before Wave 1 install  
├─ wave1_ch2.sav      <- Chapter 2 checkpoint  
├─ wave1_ch4.sav      <- Chapter 4 checkpoint  
└─ wave1_ch6.sav      <- Endgame checkpoint
```

Performance Tuning

Heavy mod loads impact performance. Recommended settings:

- **Resolution:** 1920x1080 or 2560x1440 (not 4K with heavy graphics mods)
- **Texture Quality:** Ultra
- **Reflection Quality:** Medium
- **Water Quality:** Medium
- **Volumetrics:** Low
- **Tree Tessellation:** Off

Troubleshooting

Game Crashes on Launch

1. Verify game file integrity in your launcher
2. Remove all files from `lml_mods/` — test in vanilla
3. Re-install LML: replace `version.dll`
4. Check `Documents/Rockstar Games/RDR2/Settings/system.xml` for corrupted settings

Mods Not Loading

1. Ensure `version.dll` is in the game root
2. Verify each mod's folder structure matches LML expectations
3. Check LML's log (generated in the `LML/` folder)
4. Mods requiring Script Hook won't work without `ScriptHookRDR2.dll`

Save File Issues

- Disable all mods before loading a vanilla save
- Wave 1 saves are not backward-compatible with Wave 0
- Backup saves before adding or removing mods

Performance Tuning

Setting	Wave 0	Wave 1
Resolution	1440p	1080p
Texture Quality	Ultra	Ultra
Reflection Quality	High	Medium
Water Quality	High	Medium
Volumetric Quality	Medium	Low
Tree Tessellation	On	Off
Near Volumetric Resolution	High	Medium
